Online Registration Now Available for Mississippi Education and Technology Innovation Symposium (METIS)

Jackson, MS. – April 17, 2017 – Attendees wishing to register for the upcoming Mississippi Education and Technology Innovation Symposium (METIS) can now conveniently access the Department of Education [METIS Event Registration Application](#) online, saving time with a shorter, faster registration process.

This new process creates a user-friendly method for registrants to sign-up as an Attendee or Exhibitor. Registering as an Attendee permits the user to choose the sessions that they will attend, along with the times of the sessions throughout the week. Registering as an Exhibitor allows users to purchase a sponsorship, and set up a booth for the METIS event. The online system prompts registrants through secure payment screens and quickly provides a payment confirmation and a receipt for registrant's records.

METIS registrants can visit https://www.ms.gov/mde/metis_registry and choose to register as an attendee or exhibitor. The current registration period is now underway and concludes on June 2, 2017. Individuals looking for information regarding the METIS event can access the event website at <http://www.mdek12.org/OTSS/metis/2017>.

The METIS Event Registration Application was developed at no cost to Mississippi taxpayers and joins over 190 innovative digital services created for the state of Mississippi through its partnership with Mississippi Interactive, which began in 2010.

About Mississippi Interactive

[Mississippi Interactive](#) is the official eGovernment solutions provider for the state of Mississippi. The company builds and manages interactive government services on behalf of the state and is part of digital government firm NIC's family of companies.

About NIC

Founded in 1992, NIC Inc. (NASDAQ: EGOV) is celebrating 25 years as the nation's premier provider of innovative digital government solutions and secure payment processing, which help make government interactions more accessible for everyone through technology. The family of NIC companies has developed a library of more than 12,000 digital government services for more than 4,500 federal, state, and local government agencies. Among these solutions is the ground-breaking digital government personal assistant, Gov2Go, delivering citizens personalized reminders and a single access point for government interactions. More information is available at www.egov.com.
